

HAMZA KHALID

Full Stack Web Developer & Sales Professional

hamza@naxotop.com | +92 305 195 8846 | Mian Channu, Punjab, Pakistan | linkedin.com/in/m-hamza-kh

PROFESSIONAL SUMMARY

Full-stack web developer and sales professional with 6+ years of experience building and running technology-driven businesses. Co-founded Naxotop PVT LTD (web development company) and NayaBazar.pk (delivery startup, 30,000+ downloads). Independently designed and built MorEasy POS — a complete offline restaurant point-of-sale system (Electron.js desktop app + PHP/MySQL licensing website) — from architecture to shipping, solo. Combines hands-on development skill with proven sales, marketing, and operations experience.

WORK EXPERIENCE

Full Stack Developer (Independent)

Feb 2026 — Present

Independent / Freelance — Full-Stack Product Development

- Designed, coded, and shipped MorEasy POS — a complete offline restaurant point-of-sale system built with Electron.js, Node.js, and better-sqlite3, paired with a PHP/MySQL licensing and management website.
- Built the entire product architecture solo: local SQLite data layer, Electron shell, billing, table management, product variants, sales reports, and PIN-based multi-user staff login.
- Implemented thermal receipt printing, printer configuration, and a one-click cloud backup system that syncs the local database to the licensing website.
- Created a custom REST API (activate, verify, staff sync, backup) secured with a shared app secret, per-IP rate limiting, and strict one-license-per-device enforcement, with full server-side audit logging.
- Currently developing additional full-stack web projects, continuing to expand an independent product portfolio.

Co-Founder & Project Manager

2020 — 2026

Naxotop.com PVT LTD — Web Development Company, Pakistan

- Co-founded and managed a web development company for 6 years, overseeing 50+ projects from requirements through design, development, and delivery.
- Documented full functional requirements for every project and secured client sign-off before development began, then led teams as the primary link between clients and developers.
- Personally built early-stage projects — a blogging platform, a school website, and a student management system — using HTML, CSS, JavaScript, and PHP.
- Led a major project for a France-based daycare company (140+ locations): a web application, a contract signing system, and an employee tracking tool, managed end-to-end.
- Managed full-cycle web tool projects for an India-based company, delivering browser-based video and image editing tools from concept through launch.

Co-Founder & Operations Lead

2023 — 2026

NayaBazar.pk — E-Commerce & Delivery Startup, Mian Channu

- Designed the entire app UI/UX from scratch and coordinated the development team through the full build of the customer app, seller POS, and admin dashboards.
- Onboarded 100+ local shops with 11,000+ products listed on the platform, and grew the app to 30,000+ downloads within one year through hands-on marketing.
- Managed 100–150 daily deliveries end-to-end, along with team hiring, staff management, and all day-to-day office operations.
- Created the launch plan, marketing strategy, and all campaign materials, and continuously improved the platform based on real customer feedback.
